

# **2008 Brute Horsepower Shootout**

## **CLASS DESIGNATIONS AND REQUIREMENTS**

### **UNLIMITED CLASSES:**

1. Entries are not required to be street legal.
2. Superchargers, turbochargers, and nitrous oxide injection systems are allowed.
3. Entries may use any type of gasoline, alcohol, or other fuel; there are no restrictions on additives that may be used. Nitromethane fuel is allowed.
4. During competition, the entrant may make up to 4 pulls to achieve the necessary results. This is allowed due to the time required to load and unload these high output motorcycles.
5. A maximum of 3 minutes is allowed between pulls for cooldown, to be monitored by the Contest Judge.
6. As with the other classes, there are no limits as to how many times the entrant may re-enter the line and compete.
7. Entrants may choose to operate their own vehicle during competition. In doing so, the dyno operators will provide assistance in completing the test to collect dyno data.
